inspectiTRAC™ takes conducting inspections, audits, and observations to a whole new level by automating data collection and response. **inspectiTRAC™** mobilizes the process of data collection and evaluation via a Windows or mobile application. Inspections, audits, and observations are created and automated, which decreases errors, improves responsiveness, and reduces risk. Mobilized data collection and data entry **times can be reduced by up to 80%**, resulting in cost savings, improved data accuracy, faster response times, and elimination of paper and document storage. The system includes many features that allow for easy management of forms, reports, and data.

The system is comprised of three parts. The use of each will vary based on needs.

- ✓ **inspectiTRAC Administrator** — used to set up maps, departments, create and make changes to inspection, audit, and observation forms and their criteria.
- ✓ **inspectiTRAC Data/Web Collector** - the software used to collect data and findings. Options exist for both an offline version for Windows and for online mobile data collection.
- ✓ **inspectiTRAC Manager** - a cloud-based management system for corrective actions, reporting, alerting, and scheduling. It includes corrective action management and dashboards that allow users to view information important to them. Dashboards can be setup and accessed directly by company personnel on their laptop, tablet or smartphone.

So why choose inspectiTRAC™?

Reduces Risk / Exposure via:

- ✓ Standardized observations and inspections can be scheduled, and essential resources notified
 - Mapping of inspection item/equipment location linked to the correct form reduces time spent locating resources
- ✓ Easier access to data improves response time to failures/concerns
 - Customizable, flexible system includes the ability for multiple question types and response options
 - Custom notifications allow you to notify individuals/teams to complete a task

inspectiTRAC™ can be used across departments and within many industries. Seamless updates and management of forms and data make it easy to manage. It is designed to save money and time by simplifying data collection and management. Reminders, scheduling, and email notifications are all included making inspectiTRAC™ the ideal solution for all of your inspection, audit, and observation needs.

Still using paper forms that need to be handwritten and/or transcribed to complete your inspections, audits, and observations? **inspectiTRAC™ is an automated inspection system** available for use on both Windows-based and mobile devices. **inspectiTRAC™ reduces inspection time, saves you money, and reduces risk.** With automated data collection, it is easy to respond and react when concerns arise.
